

To the Citizens of Tubac and Surrounding CommunitiesL

December 8, 2021

This letter is in support of the request by the Tubac Fire Department to build a new facility in Tubac. Chief Horvath and her staff have provided ample justification for the bond initiative to build a new fire station.

The current fire station is out dated , inadequate and not even ADA compliant. With all of the new construction going on all over Tubac, the need for a modern upgraded fire station is even more acute.

Since the tragic events of 9-11, this country has vehemently voiced its support for first responders. Our Tubac first responders provide a critical service to our community. They deserve a modern and comfortable state-of-the-art facility so that they can provide the help we need in the event of a fire or medical emergency.

As former Superintendent of the Santa Cruz Valley Unified School District for almost 12 years, I understand how difficult it is to obtain bond funds for building projects. Please join me in supporting the Tubac Fire Department in this much needed endeavor.

Sincerely ,

Daniel Fontes
